ALAC Statement on the Consumer Metrics Final Advice

The ALAC, after having reviewed the Report prepared by the Consumer Trust Working Group, hereby endorses its contents and thanks the members of the working group for their work.

Trust in the Internet's Naming System is of paramount importance to Internet Users. We believe that the set of metrics proposed by the working group will help track the New gTLD program, according to the requirements of the Affirmation of Commitments, and recommend that these are forwarded to the ICANN Board for implementation.
