

"Foundation Include Me"

Foundation Include Me is organized by the President and its active Members.

The members are young professionals, all interested and involved in the process of Internet governance and in the development at local, regional and international levels.

"Foundation Include Me" Objectives

The main objective is training new leaders for the governance of the Internet, having as its axis and development goal as the "School of the South for Internet Governance" of the LAC.

The governance of Internet is a cross-cutting issue, affecting all those related to different aspects of the Internet. Paradoxically, at this time no study programs or university training programs that teach about the governance of Internet from an integral perspective exist in the region, or even in the world.

The governance of Internet is much more than the administration of the domains. According to the definition elaborated by the Working Group on Internet Governance, in 2005, it deals with: "The development and application of principles, norms, rules, proceedings and programs that shape the evolution and use of Internet"

"Foundation Include Me" Activities and Accomplishments

Once a year, the "School of the South on Internet Governance" is held.

In March, 2009, the first "School of the South on Internet Governance" was held in Buenos Aires.

In March, 2010, the event was held in Sao Paolo, Brazil.

The organization of the next "School of the South on Internet Governance" for 2011 is in progress, with the planned location of Mexico City.

Currently, 80 students have been trained from different countries in the LAC region. 35 international professors participate as consultants.
